24 Hours at your Service

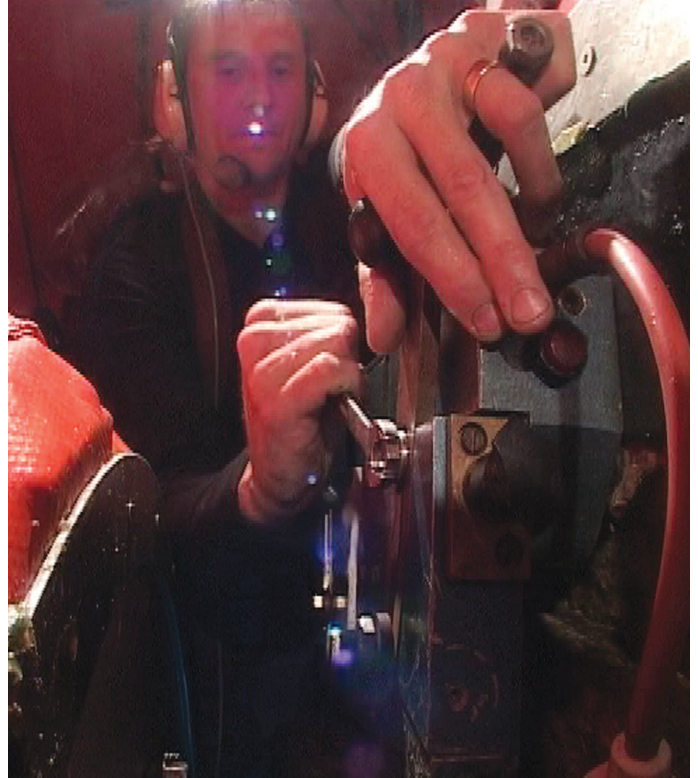

Underwater Stern tube Seal Replacement and Repair

Our Simplex-Turbulo Systems product range ensure safe ship operations, environmental protection and optimum economy for the fleets worldwide. Simplex-Compact seals for vessels of all kinds stand for maximum reliability and durability through innovative technology. More than 50,000 units delivered substantiate our leading position in the world market.

For all of our Simplex-Compact seals and other products of the Simplex-Turbulo Systems range, a highly efficient after-sales service is available. This means that we are prepared at all times for the fastest possible service including:

- Comprehensive spare part stock
- Extra production capacity
- Service staff on call 24 hrs
- Trouble shooting and technical advice if required

- Trained service specialists throughout the world
- Under water repair service

The conversion of seals to Simplex-Compact on ships in service is carried out by us regularly. Provided the necessary technical data is available a conversion can be carried out within a few days.

No time to lose in an emergency case? We provide stern tube seal repairs worldwide as well as complete rebuilds, including the bonding of new seal rings underwater, thus, no docking is necessary. In association with the Subsea Solutions Alliance, repairs are carried out using TransHab, a lightweight, inflatable habitat which is fitted around the stern tube seal to provide a dry environment. TransHab can be shipped to anywhere in the world with only a few hours notice.

Professional technicians trained and certified by Simplex-Turbulo Systems carry out seal replacements and repairs at anchor or dockside.

In addition, Subsea Solutions Alliance has certification for proprietary wet welding procedures accepted as permanent repairs.
